KEY STATS

Grades Served: 6-12

Capacity: 3,000 students

Size of Site: 78 acres

Building Area: 548,638 sq. ft.

Space per Student: 182.88 sq. ft.

Cost per Student: \$36,333

Square Foot Cost: \$199

Construction Cost: \$109,000,000

Project Cost: \$134,000,000

Completion Date: August 2015

Sustainability Rating System/Applied/Status/Level: LEED Silver

PHOTOGRAPHY: ©2014 WILLIAM MANNING PHOTOGRAPHY

For CR architecture + design, the combined Princeton Middle School and High School is the product of thoughtful visioning with Princeton administration, staff, students, parents and the community. This facility limits the number of disruptive transitions for Princeton students by housing grades 6-12 under one roof. It also provides them with state-of-the-art learning spaces

and shared community areas that would have been cost-prohibitive if duplicated for separate school campuses.

Each academic building houses science labs, art studios, project-based learning labs, learning commons and flexible breakout spaces throughout. Glass operable walls, flexible furniture, glazed entrances into learning spaces, tech nodes carved out of unused circulation space, coupled with intense professional development, visionary leaders, eager students and open-

mind staff, have paved the way for a 21st century facility.

The academic buildings are connected by Viking Village, a shared facility for not only the staff and students, but the community as well. Viking Village is home to a 2,500 seat arena-style gymnasium, performance theater, music complex, natatorium, centralized health clinic and additional community multipurpose spaces. Constructed in three distinct phases, the third and final phase is scheduled to complete in summer of 2015.
