

HIGH SCHOOL

Hamilton Southeastern College and Career Academies Fishers, IN

Hamilton Southeastern Schools had an ambitious goal: to transform the way students prepare for higher education and the workforce. Out of this vision, two new College and Career Academies were born. Designed as additions at two campuses—Fishers High School and Hamilton Southeastern High Schools—the academies allow students to take control of their educational journey and develop the critical-thinking skills needed for the next phase of their lives.

New construction created a dynamic home for each College and Career Academy. Lounge areas, study rooms for digital collaboration, and dining areas with café seating bring students together in a variety of ways. In the academic areas, classrooms with glass operable walls surround large learning hubs and multiple small group meeting areas. Renovations established equity between the buildings by updating performing arts, fine arts, and athletic spaces.

For the Hamilton Southeastern community, the results have been amazing. “You can see students taking control of their learning,” says one assistant principal. “They’re working in groups, collaborating and not waiting for a teacher to tell them to do something.” Another school administrator credits the buildings with, “taking the high school experience to places we’ve never been before.”
