

HIGH SCHOOL

# Minnetonka VANTAGE High School

Minnetonka, MN

In the VANTAGE program, students from the Minnetonka High School partner with the professional community in this problem-based professional setting. The professional learning

environment requires the students to initiate, work, and even dress in a way that their future employers will expect.

Courses are consciously planned off of the main high school campus in an office complex to give students a taste of that environment. The growing course offerings include Healthcare and Sports Science, Business in a Global Economy, Business Analytics, Design

and Marketing, and Digital Journalism.

Designed as innovative work space the conferencing, work, lab, and presentation spaces offer a place for natural work flow. Flexible furniture and technology help to support the collaborative problem solving. The spaces help to engage students, staff, and businesses in this new approach to project-based learning.
